INTRODUCTION

I'm a professional Senior Full-Stack Developer with over 6 years of experience in developing high-quality web applications. I specialize in building scalable and efficient solutions using the latest technologies and best practices.

My technical expertise includes:

✓ React.js and Next js for front-end development
✓ MUI, Chakra UI, Tailwind css, HTML5, CSS3, typescript, and JavaScript for web development
✓ Git, GitHub, and Bitbucket for version control
✓ Node.js for back-end development
✓ MongoDB, MySQL and PostgreSQL for database management

I have experience in developing a wide range of web applications, including e-commerce platforms, social networking sites, content management systems, and more. My projects have involved complex integrations with third-party APIs, real-time communication features, and responsive designs for optimal user experience.
