[LinkedIn Profile](#) • Rawalpindi, Pakistan

Personal Details:

08/05/1994 • Pakistan • Pakistani • Male

Highly skilled Full-stack Engineer, Specialize in building scalable and high-performance web applications while adhering to industry standards and best practices. I focus on crafting dynamic user experiences and optimizing backend systems to ensure efficiency, security, and maintainability. My development approach emphasizes clean code, performance optimization, and modern architectural patterns to deliver seamless digital solutions.

I am passionate about learning and adopting the latest and most efficient technologies to enhance development workflows and drive innovation. Thriving in fast-paced environments, I continuously refine my skills to stay at the forefront of web development.

Technical Proficiencies

Tools:

Git | GitHub | GitLab | Postman | Docker | Linux | Ubuntu | macOS | JIRA | Google Analytics | SSH | SMTP
| MySQL | PostgreSQL | MongoDB | Redux | Webpack | Vite | TypeORM | Drizzle | Knex | Jest | DynamoDB
| PostgreSQL | Rabbit MQ | Zustand | Framer motion | Tanstack Query

Frameworks:

Express | Next.js | GraphQL | ExpressJS | React.js | Bootstrap | jQuery | Node.js | TypeScript | ES6
| JSON | XML | HTML | JavaScript | CSS | OAuth | OAuth2 | REST | Graph API | HTTP

Areas of Expertise

- Full Stack Development
- Database Management
- Team Collaboration & Mentoring
- API Design & Implementation
- Website & Software Optimisation
- Security Practices & Compliance

Professional Experience

Coded Harmony, Lahore

2023 to 2024

Full Stack Developer

Worked on a key project by leading dedicated team of three, with focus on introducing innovative features to enhance project functionality. Direct development and execution of comprehensive unit testing protocols for ensuring software reliability and performance consistency. Conducted thorough code reviews, upholding high standards of code quality and fostering a culture of continuous improvement and collaboration within team.

- Worked on microservices architecture.
- Maintained reusable GitHub Actions workflows, reducing development time and promoting code efficiency across projects.

Soothsai, California

2021 to 2023

Senior Full Stack Developer

Collaborated with engineering teams to assess software and hardware interfaces, ensuring seamless integration and optimal performance. Worked on the frontend to implement scalable and user-friendly interfaces while ensuring seamless functionality across devices. Designed and implemented RESTful web services to manage dynamic datasets, enhancing data accessibility and system functionality. Conducted unit testing and troubleshooting of web applications, maintaining high standards of quality assurance. Oversaw creation and execution of automated build and deployment pipelines, streamlining development processes.

- Optimised web applications, resulting in enhanced speed and security.
- Develop and maintain front end using next js, redux, style-components for better user experience and scalability.

- Developed and maintained databases using NodeJS, ORM, SQL/NoSQL, optimising for speed, scalability, and security.
- Designed and developed SaaS platform inspired by Make.com's functionalities, utilizing serverless architecture to enable customized workflow creation, showcasing exceptional technical proficiency and creative problem-solving capabilities.
- Developed functional databases, applications, and servers for supporting entire backend infrastructure, contributing to robust and scalable web solutions.
- Played pivotal role in planning and executing RESTful web services, improving data manipulation and system interactions.
- Leveraged GitHub Actions for CI/CD, significantly improving the efficiency and reliability of software delivery.

Iplex, Islamabad
Full Stack Developer

2020 to 2021

Developed robust, scalable full-stack applications using Node.js, React, and Nextjs, enhancing overall system architecture and performance. Implemented highly scalable and maintainable front end solutions with latest frameworks and tools. Implemented CI/CD pipelines with GitHub Actions, optimising development workflows and boosting team productivity. Troubleshoot software development issues by applying problem-solving skills to deliver elegant solutions. Adapted swiftly to new technologies, ensuring alignment with industry trends and project requirements.

- Implemented front-end solutions using latest technologies with industry standards and best practices.
- Played pivotal role in team collaboration, sharing expertise and guiding junior developers to improve project outcomes.
- Maintained high standards of code quality and best practices, contributing to reliability of software products.
- Streamlined development processes by implementing CI/CD pipelines using GitHub Actions, resulting in enhanced reliability and faster delivery of software updates.

Education

Bachelor of Science in Computer Science (GPA: 3.03)
COMSATS University, Islamabad

Key Projects

Mastery Prep

- Designed and developed Mastery-Prep, an innovative system that provides online test preparation materials and services to students, leveraging JavaScript, Node.js, React, Material UI, Redux, to create dynamic , scalable and robust solution to user for seamless functionality and user experience.

SelfiePop

- Selfipop a platform for celebrities, influencers and creators to engage with their fans. Utilised real-time data and managed user subscriptions, through high optimized and scalable solutions using react js, node js, redux , style-components.

Only Clones

- Developed Only Clones, an advanced AI-driven platform that utilises generative AI and OpenAI technologies to deliver role-based chat interactions, including friendly chats and therapeutic sessions.
- Implemented scalable and cross devices functional interfaces with react js for faster, efficient and user-friendly interactions.
- Enhanced with Stable Diffusion and Knex.js for smooth user experiences and built on serverless architecture for scalability.
- Automated workflows are managed via GitHub Actions, with monetisation achieved through Stripe integration and personalised recommendations powered by Pinecone.
